

# SKY EYE

A Remote Peace Of Mind

## Protect your home

**Guardian prevents intruders from breaking into your home.** We use smart CCTV to detect intruders as soon as they step foot on your grounds. We then intervene with real-time audio alerts to ensure they leave your premises before any damage is done.

I am often away with business. Guardian gives me real peace of mind that my family are safe when I am not there.

*Satisfied Guardian user since 2012*

# Protecting more than just your house

Guardian uses smart cameras to detect intruders as soon as they step foot on your grounds.

Highly trained professionals immediately intervene with live audio challenges, ensuring that the intruder does not have time to enter your home or steal your property.

Guardian will give you peace of mind that you never knew to be possible. Controlled by our unique app, Guardian is your own personal, on-demand, remote security guard.

Whether you are home alone, away from your house or just going to sleep, Guardian gives you the comfort of knowing the staff in our 24-7 Control Centre are protecting your home.

# Your remote security guard

The highly trained staff in our 24-7 Control Centre are constantly on standby whenever you want us to be.

If an intruder is ever on your grounds, our staff will intervene with live audio challenges before the intruder gets inside your home.

# Closing the window of opportunity

## Continual Perimeter Coverage

Intelligent cameras that can detect people or vehicles are always recording your perimeter, and ready to be monitored on demand at any time.

## Arm on Demand

Whenever you want your property to be monitored, you arm relevant zones using the app. Disarm when you do not want them monitored.

## Immediate Intruder Detection

The moment an intruder steps foot on the grounds of the property, the smart cameras send a video alert to the RE:SURE Control Centre, where the site is viewed in real-time.

## Instantaneous Audio Intervention

The window of opportunity is shut by the immediate issuing of a live audio challenge. Any intruders are commanded to leave the property.

## Intruder Flees Premises

The intruder flees from site upon hearing the audio challenge, as they know they have been identified and a physical response could arrive at any moment.

## Keyholder & Police Notification

In addition to the audio challenge(s), keyholders & emergency services are also called. A detailed report is emailed to all keyholders.

# 21st century control

**Guardian is controlled by RE:SURE's proprietary app, RE:SURE I/O.** Outside of being able to arm your system from anywhere, there a host of additional benefits and features:

## Smart Control

RE:SURE I/O can control your gate & auto-disarm just your front cameras as you enter.

## Zoned Arming

Have a BBQ in your back garden while the rest of the property is armed and monitored.

## Easy User

**Management** If your gardener changes, remove access with a single swipe.

## Never Forget

Between auto arm/disarm and smart reminders, your home will never accidentally be left unprotected.

# Complete peace of mind

## Never Inside Your Home

Preventing invasion of your privacy by detecting intruders when they are on your grounds and intervening immediately.

## More Than Your Home

Guardian protects your vehicles and other assets that are outside against theft too.

## Ease of Use

Simple and easy to control, RE:SURE I/O makes for seamless control of the system.

## Any Camera - New or Old

Guardian can be retrofitted to all existing CCTV cameras or newly installed with minimal disruption.

## Always on Standby

You can get on with your life, knowing our 24-7 team will intervene the moment we are called into action.

## Always Know

With Guardian and I/O you will have complete visibility of all movements around your home, always.

「Guardian doesn't just  
alarm break-ins; it  
**prevents** them.」
